Introduction

My colleagues,

My dear students,

The textbook is one of the most essential pillars of the educational system, as it embodies national values and provides fundamental knowledge. It is a symbol of a nation's sovereignty, instilling the values of citizenship and belonging in the hearts of students. It also serves as a prominent source from which learners acquire their initial understanding of their nation.

Since the latest revision of the educational program aims to establish an effective educational system, -one that considers students, teachers, as partners in the process of educational and intellectual development-the National Pedagogic Institute, by providing this and other textbooks, offers you a pedagogical tool that supports both teaching and learning. Your feedback and suggestions are therefore, considered a crucial and necessary element in enhancing the quality of future editions.

Fellow educators

Dear students,

Here is the English textbook for the second grade of secondary school at your disposal. And, this is a joyous occasion that calls for congratulations-to you and to the dedicated teams at the national pedagogic Institute- who worked on authoring, designing, reviewing and printing this book. To you all, my warmest congratulations and best wishes.

Dear students,

There is no doubt that you recognize the value of these books, the effort invested in their creation and publication, and the sacrifices your parents make to provide them for you. Therefore, it is essential that you keep them clean and in good condition, take care of them, and consider them your loyal companions. For they are, indeed, your best friends.

Finally, I wish you a school year filled with hope, success, and achievement.

Foreword

Given the importance of English in today's world, the 1999 reform of the Mauritanian educational system introduced English in junior high school. The Mauritanian Government through the Ministry of National Education and Educational System Reform has made this decision to meet the growing needs of the learners to master the English language for their personal, educational, social and professional purposes. Thus, the secondary school curricula were rewritten in August-September, 2020 based on the holistic vision, which puts the learner at the heart of its interest. This book has been updated to align with the changes introduced by the Education Orientation Law of 2025, whereby junior high school lasts three years instead of four, and English is, as of now, taught for 3 hours a week with a coefficient of 2, instead of 2 hours a week with a coefficient of 1, as was the case in the previous reform.

We hope that this textbook meets an interest in the learner and contributes to the acquisition process so that you, the students, get to level up your motivation in learning English.

Dear teachers, we hope that you enjoy using this book with your motivated learners; and help inspire and re-shape their way of thinking and acting.
